[Portfolio Website](#)

Accomplished Senior Software Engineer with 10+ years of experience in full-stack web development, specializing in Ruby on Rails, Python, JavaScript (Vue.js, Angular.js), and Git. Adept at designing and implementing scalable web applications, with a proven ability to lead teams, mentor junior developers, and deliver high-quality, secure software solutions.

Strong expertise in PostgreSQL, cloud-based infrastructure, and micro-services architecture. Passionate about solving real-world problems through technology, improving user experiences, and collaborating closely with cross-functional teams to drive product success. Skilled in both technical leadership and hands-on development.
